

TEXTILE TRADES

Manufactured Textiles Technician: A qualification in manufactured textile products will provide you with trade-level technical skills to support and advance your future career in the specialised textiles industry. Throughout the course, you will receive training in specialised technical, operational and supervisory skills which can be applied to many manufacturing companies. No prior training is required.

Future career opportunities include:

- Sail Maker
- Canvas Goods Fabricator
- Project Design Manager
- and much more!

In this role, you'll be responsible for designing and producing specialised products such as:

- Shade sails
- PVC and canvas products
- Outdoor blinds and awnings
- Industrial canopies

Relevant qualifications: Certificate III in Manufactured Textile Products (Apprenticeship)
